-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,284,302 to Berger et al in view of U.S. Patent No. 5,549,922 to Juchem. Berger et al discloses the claimed invention, including cooling pasty mixtures with liquid carbon dioxide. However, Berger et al does not disclose the step of combining the pasty mixture with gaseous carbon dioxide. Juchem teaches that it is old to combine a pasty mixture with gaseous carbon dioxide. See, for example, column 2, lines 28-35 and also line 52. Thus, it would be obvious to combine the pasty mixture of Berger et al with gaseous carbon dioxide, in view of Juchem, to yield the predictable result of reducing the microorganism population of the pasty mixture. The temperatures and pressures of the liquid carbon dioxide are considered to be matters of obvious choice to one of ordinary skill in the art. No criticality or unexpected results are seen or have been disclosed for the claimed temperatures or pressures for the liquid carbon dioxide. Furthermore, one of ordinary skill in the refrigeration art would be able to choose the appropriate temperature and/or pressure for the liquid carbon dioxide without undue experimentation. Likewise, the claimed particle size is also considered to be a matter of obvious choice to one of ordinary skill in the art.
3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on May 1, 2006 are clearly informal and are hard

to read. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Tapolcai whose telephone number is (571) 272-4814. The examiner can normally be reached on Mon. - Thurs., 6:30 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
